# VELOCITY™

Advanced Cover System

Our Velocity Advanced Cover System is a game-changing innovation!

The Velocity system increases living space and makes it possible to install and remove dress covers in just seconds. It reduces maintenance and OEM assembly costs and is convenient because it does not require tools.

With customizable styles, patterns and headrest cushions, the Velocity system is the perfect fit and finish every time.

**Velocity™ ensures an accurate fit and finish every time. Ease of installation results in consistent high-level appearance and uniformity throughout the cabin.**

The Velocity Advanced Cover System is secured by engaging a patent-pending wire form Velasco™ in a specially configured channel M-tag™.

The Velocity system can be mounted on either the front or rear of the seat frame and can be incorporated onto existing platforms.

Velocity is available in Versastyle™ – a new reversible cover that provides two finished sides on a single cover.

Versastyle brings even more cost savings and styling options. Versastyle dress covers can be supplied with a duplicate finish on both sides allowing for extended service life and dry-cleaning intervals. With two different designs, Versastyle allows for multiple styling options under a single SKU as well as versatility in cabin configuration.
